Give Up!

A Mirakle Touch
Is All It Takes!

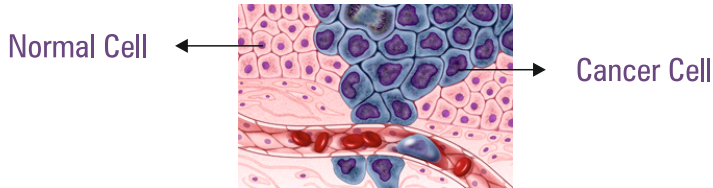

Mirakle Integrated Health Centre (MIHC), Pollachi, Coimbatore district, Tamil Nadu, is a first-of-its kind integrative medicine setting in India that specialises in integrative oncology. We treat all types and stages of cancer. This 30-bed inpatient integrative medicine hospital was inaugurated by the Hon'ble Vice President of India, Sri M Venkaiah Naidu, in 2018.

At MIHC, we use a blend of yoga and Naturopathy, homoeopathy, Siddha, and modern medicine in unison with functional medicine approaches to treat various kinds of disorders. Our team of doctors has developed an intensive and individual treatment programme (the Mirakle Protocol) for all types and stages of cancer. The treatment approach at Mirakle Integrative Health Centre is unique, recognising cancer as a metabolic disease and not a genetic one. Our primary aim is to improve the quality of life, prevent metastasis, and facilitate a symptom-free and fear-free life for cancer patients.

Cancer-a metabolic disease

Cancer is the first or second cause of death worldwide which accounts for nearly one in six deaths. Is cancer curable or can we live with cancer? This is a million-dollar question.

Cancer can only survive in the body if there is,

- ❖ An acidic environment in the body
- ❖ Low level of vitamin C (ascorbic acid levels) in the body
- ❖ Defective Mitochondrial function
- ❖ Reduced oxygen levels (tissue hypoxia)
- ❖ Excess amount of glucose supply
- ❖ Increased oxidative stress

This is common in all types and stages of cancer. We at MIHC treat cancer as a metabolic disorder by addressing these systemic factors that promotes the progression of cancers.

Types of cancers treated at MIHC

MIHC treat all types of cancers but not limited to pancreas, skin, brain, esophagus, thyroid, breast, lung, colon, rectum, prostate etc. We specialize in handling all types of carcinomas, sarcomas, myelomas, leukemias, and lymphomas.

What is Integrative oncology?

Frequently asked questions

How long I have to stay for my treatments?

A typical cancer patient may have to stay at our hospital for 1 to 2 months to ensure the condition is properly addressed and also to learn how to handle the progression of the disease. This may differ from patient to patient based on the type and stages of cancer.

Whether the therapies offered will have any side-effects?

All the therapies offered at MIHC are safe, effective and evidence-based therapies with no side effects.

What are the other services available at MIHC?

Besides cancer, MIHC also offers integrative medicine therapies for Cardiovascular diseases, Hypertension, Diabetes Mellitus, Kidney disorders, Musculoskeletal disorders, pain management, liver disorders, skin disorders, stress and anxiety, obesity, PCOD, and menstrual disorders.
